

READY TO START A NEW CAREER?

THIS MAY BE THE OPPORTUNITY YOU'VE BEEN WAITING FOR!

Do you like working with your hands? Can you work alone or in a team? Are you comfortable with heights, and in confined spaces? If you answer "yes" to these questions, then we have an opportunity for you.

DELIVERY DETAILS:

Dates: April 24 - July 14, 2023 (12-weeks)

PROGRAM DESCRIPTION:

The Insulator Pre-Employment Program is a 12-week job readiness program that includes:

- An intro to the insulator trade
- Industry relevant safety training (WHMIS, Fall Protection, Aerial Lift, 1st Aid, Confined Space, Asbestos Awareness, Ladder Safety)
- In-class theory and hands-on training activities
- Math, basic computers, effective communication, & job-readiness training
- 2 weeks of monitored work placement with a local employer

WHAT IS AN INSULATOR?

Heat and frost insulators are responsible to work with different insulation material to prevent the passage of heat, cold, moisture, vapour, sound and fire. They interpret design specifications to determine what must initially be installed, and also maintain these materials after installation. Sometimes, insulators will lay out and fabricate parts on the job, or be called upon to seal off or remove older insulation and reduce health risks to adjacent workers or the general public. The structures and systems they might be required to work on include: plumbing, air handling, heating, cooling and refrigeration, piping and pressure vessels, walls, flooring, and ceiling. Insulators must be prepared to work indoors and outdoors, in shifts, and travel between various locations. They are required to work from heights, and in confined spaces.
